AMIT KUMAR SHUKLA

Senior Digital Architect | Enterprise Architecture & Digital Delivery Leadership
Burnaby, BC, CA • 236-863-4703 • amit_kr_shukla@yahoo.com • linkedin.com/in/amit-kr-shukla

PROFESSIONAL SUMMARY

Digital Architect with 20+ years designing and delivering enterprise-scale digital solutions across regulated industries — 17 inside HSBC's global banking estate. Transformation leadership: drove architecture and technical direction for 100+ resources across multi-country Agile teams, unifying 400+ business functions for global staff. Cross-functional delivery: partnered with UX and frontend teams to define API contracts matching human-centred design intent; took a greenfield platform from requirements to production in 3 months. Modernization: legacy platforms (portal/WebSphere to Spring), cloud-native design (AWS, Kubernetes), event-driven architectures (Kafka, IBM MQ). Secure services: JWT-secured transactions, identity & fraud validation, RBAC/IAM access policies; DevSecOps — Jenkins CI/CD, automated testing, observability (Splunk, AppDynamics, Kibana), metrics-driven releases. Communicates complex tradeoffs to non-technical stakeholders and influences decisions at executive levels.

CORE SKILLS

Solution & Enterprise Architecture: solution architecture for large-scale systems; domain-driven design; OpenAPI contracts; enterprise integration patterns; technical direction for 100+ resources; reusable platform components and standards adopted group-wide

Digital Delivery & Agile: SAFe/Scrum leadership; cross-functional Agile product teams; human-centred delivery — API contracts matched to UX intent; 3-month greenfield launch (Verizon); multi-channel digital journeys (digital, assisted, POS)

Modernization: legacy modernization (WebSphere/portal to Spring); cloud-native design on AWS and Kubernetes (KCNA); containerized deployments; event-driven microservices (Kafka, IBM MQ); microservices on Pivotal Cloud Foundry

Security & Access: banking-grade security controls — JWT token security, identity & fraud validation flows, RBAC/IAM access policies, audited regulatory-compliant systems; security-by-default design

APIs & Integration: REST/OpenAPI & SOAP service design; system-to-system API contracts; backend-system and third-party integrations; reactive services (RxJava, Spring Flux); fault tolerance (Hystrix)

DevSecOps & Observability: Jenkins CI/CD; automated testing (JUnit, Mockito, JMeter); observability standards (Splunk, AppDynamics, Kibana); incident response; safe deployment and rollback; production support with continuous evolution

Data: PostgreSQL, DB2, Cassandra — relational and non-relational

Leadership & Influence: mentoring developers and technical leads; architecture reviews; tradeoff communication to executives and non-technical stakeholders; cross-team alignment across release, security, and product

WORK EXPERIENCE

Architect | Infinite Computer Solutions (Canada) Ltd
Oct 2024 – Jul 2026

- **Technical leadership, end-to-end:** managed the full API lifecycle across all layers; defined API contracts and architecture that took a greenfield platform from requirements to production within 3 months; stayed hands-on through design, implementation, testing, and operational support.
- **Engineering quality:** Java 17, Spring Boot/Flux microservices on AWS and containerized environments; Jenkins CI/CD, automated tests (JUnit, Mockito), Kibana monitoring and metrics driving operational decisions.

Technology: Java 17, Spring Boot, Spring Flux, Microservices, Docker, AWS, JUnit, Mockito, Jenkins, Kibana, GitLab, BDD

Architect | Cognizant (Canada) Ltd
Mar 2024 – Oct 2024

- Spearheaded end-to-end high-level design (HLD) and finalized system-to-system API contracts across assisted, POS, and digital channels; primary technical point of contact for offshore teams — mentoring, reviews, and delivery alignment; Java 17 microservices with Spring Boot/Flux on AWS backed by Cassandra.

Technology: Java 17, Spring Boot, Spring Flux, Microservices, Cassandra, AWS, Jenkins, Kibana, GitLab

Sr. Technical Lead | HSBC Global Services (Canada) Ltd
2021 – Sep 2023

- **Team leadership:** defined low-level application architectures and led technical direction across 100+ resources and multi-country Scrum teams on the multi-year “MyWorkspace” initiative unifying 400+ business functions; mentoring, coaching, and delivery accountability.
- **Hands-on delivery:** architected asynchronous microservices with RxJava and Hystrix fault tolerance; JWT-secured real-time transactions against core banking systems via MQ; observability with Splunk and AppDynamics; production on-call with incident response.

Technology: Java 8, Spring Boot, RxJava, Hystrix, Microservices, Kubernetes, Docker, AWS, Jenkins, Splunk, AppDynamics

Architect / Team Lead | HSBC Global Services (Canada) Ltd
2018 – 2021

- **Fraud validation leadership:** finalized solution designs and led developers end-to-end — concept to production — for HSBC Canada’s Retail Business Banking onboarding platform (identity & fraud validation flows), deployed on Pivotal Cloud Foundry.
- **Operational ownership:** owned production support, releases, and safe evolution of the platform; complex third-party API and backend-system integrations with metrics-driven operational support.

Technology: Java 8, Spring Boot/Core, Microservices, RxJava, Hystrix, PCF, Jenkins, Splunk, AppDynamics

Lead Consultant Specialist | HSBC Software Development (India) Pvt Ltd
2016 – Mar 2018

- Designed REST microservice APIs mapped from backend-system dependencies for HSBC’s retail “Banking & Services” platform — architected for multi-market/regional scale (single logical, multiple physical instances); established development guidelines adopted across scrum teams.

Technology: Java 8, Spring Boot/Core, Microservices, RxJava, PCF, Jenkins, Splunk

Sr. Consultant Specialist → Sr. Software Engineer | HSBC Software Development (India) Pvt Ltd
2006 – 2015

- Tech lead and Scrum Master for the Global Services Platform landing-page workstream — a platform designed for group-wide reuse across regions; led 10–12 member cross-functional teams across application layers, facilitating delivery and ceremonies.
- Earlier: framework-level components for staff-facing banking applications; led the Quotes stream (8 engineers) for 20+ insurance products.

Technology: Spring Core/MVC/Integration, REST/SOAP, WebSphere Portal, Dojo

Sr. Software Engineer | Cybage Software Pvt. Ltd., Pune, India
2004 – 2006

- Implemented major ChannelWave PRM functionality; led Lucene-based text search for the 6.3 release; performance improvements, UML design, bug fixing and production support.

Technology: Java, Lucene, UML

CERTIFICATIONS & AWARDS

- **Generative AI Leader** — Google
- **Kubernetes and Cloud Native Associate (KCNA)** — Linux Foundation
- **Architecting with Google Compute Engine** — Coursera
- **Professional Scrum Master I & II** — Scrum.org
- **AI For Everyone** — Coursera
- HSBC “RISE,” “TEAM,” “STARS,” and “SPOT” awards

EDUCATION

MCA (Master of Computer Applications) — Sikkim Manipal University, India (2006–2009)

Diploma in Advanced Computing — C-DAC ACTS, Hyderabad, India

B.Sc. — Mahatma Jyotiba Phule Rohilkhand University, Bareilly, India
